GENERAL INFORMATION

Product Description:
A two component system for repairing and protecting surfaces against abrasive attack. The product is based on high molecular weight polymers and oligomers incorporating abrasion resistant ceramic aggregates. This material may be applied from 1/8 inch (3 mm) to unlimited thickness onto horizontal or vertical surfaces.

Application Areas:
When mixed and applied as detailed in the Belzona Instructions for Use (IFU), the system protects the substrate from abrasive attack and is ideally suited for application to the following:
- Pipe bends
- Wear plates
- Chutes and hoppers
- Centrifuges
- Deflector screens
- Mixing bowls

APPLICATION INFORMATION

Working Life
Will vary according to temperature. At 77°F (25°C) the usable life of mixed material is 20 minutes.

Coverage Rate:
Each 1 kg applied at 1/8 inch (3 mm) thickness will cover approximately 1.60 sq.ft. (0.149 sq.m.).

Cure Time
Cure times will vary depending on the ambient conditions and will be reduced for thicker sections and extended for thinner applications. At a thickness of approximately 1/4 in. (6 mm), allow to solidify for the times shown in the Belzona IFU before subjecting it to the conditions indicated.

Volume Capacity
26.85 cu.ins. (440 cc)/kg.
53.7 cu.ins. (880 cc)/2kg unit.
537 cu.ins. (8.8 litre)/20kg unit.

Base Component
Appearance  Granular thixotropic paste
Color  Grey
Density 2.2 - 2.4 g/cm³

Solidifier Component
Appearance  Granular thixotropic paste
Color  Red
Density 2.0 - 2.1 g/cm³

Mixed Properties
Mixing Ratio by Weight (Base : Solidifier) 4.5 : 1
Mixing Ratio by Volume (Base : Solidifier) 4 : 1
Mixed Density 2.27 g/cm³
Useable Life at 70°F (22°C) 20-25 mins
at 50°F (10°C) 45-60 mins
Tack Free Time at 71°F (22°C) 4½ hours
at 50°F (10°C) 8 hours
Slump Resistance nil at 0.5 inch (12.7 mm)

The above application information serves as introductory guide only. For full application details including the recommended application procedure/technique, refer to the Belzona IFU which is enclosed with each packaged product.
ABRASION

Taber
The Taber abrasion resistance determined in accordance with ASTM D4060 with 1 kg load is typically:
H10 Wheels (Wet)  51 mm³ loss per 1000 cycles
Impact Abrasion
Test consists of firing 2 kg of G34 chilled iron grit at 75 psi and 90° angle:
Belzona 1812 volume loss 8 mm³

ADHESION

Tensile Shear
When tested in accordance with ASTM D1002 typical values will be:
1950 psi (13.4 MPa)

CHEMICAL ANALYSIS

The mixed Belzona 1812 has been independently analyzed for halogens, heavy metals, and other corrosion-causing impurities, with the following typical results:

<table>
<thead>
<tr>

CHEMICAL RESISTANCE

While specifically designed for dry heat abrasion resistance, Belzona 1812 exhibits excellent chemical resistance to most commonly found chemical substances including inorganic acids and bases.

COMPRESSIVE PROPERTIES

When determined in accordance with ASTM D695, typical values will be:

Compressive Yield Strength
14600 psi (100.6 MPa)  7 day cure
10850 psi (74.9 MPa)   24 hour cure
17000 psi (117.2 MPa)  24 hour 100°C post cure

FLEXURAL PROPERTIES

When determined in accordance with ASTM D790, typical values will be:

Flexural Strength
7000 psi (48.2 MPa)   68°F (20°C) cure
9250 psi (63.8 MPa)  212°F (100°C) cure

HEAT RESISTANCE

Heat Distortion Temperature (HDT)
Tested to ASTM D648 (264 psi fiber stress), typical values obtained will be:
122°F (50°C)   68°F (20°C) cure
208°F (98°C)   212°F (100°C) cure

Dry Heat Resistance
The indicated degradation temperature in air based on Differential Scanning Calorimetry (DSC) operated in accordance with ISO11357 is typically 392°F (200°C). For many applications the product is suitable down to -40°F (-40°C).
For many typical applications of dry abrasion, the product is suitable up to 300°F (150°C).

IMPACT RESISTANCE

Izod Impact Resistance
Tested to ASTM D256 using notched test pieces is typically:
1.85 kJ/m²   68°F (20°C) cure
3.04 kJ/m²   212°F (100°C) cure

SHELF LIFE

Separate base and solidifier components shall have a shelf life of 5 years from date of manufacture when stored in their original unopened containers between 32°F (0°C) and 86°F (30°C).
Belzona guarantees this product will meet the performance claims stated herein when material is stored and used as instructed in the Belzona Information For Use leaflet. Belzona further guarantees that all its products are carefully manufactured to ensure the highest quality possible and tested strictly in accordance with universally recognised standards (ASTM, ANSI, BS, DIN, ISO etc.). Since Belzona has no control over the use of the product described herein, no warranty for any application can be given.

**Available and Cost**

Belzona 1812 is available from a network of Belzona Distributors throughout the world for prompt delivery to the application site. For information, consult the Belzona Distributor in your area.

**Health and Safety**

Prior to using this material, please consult the relevant Material Safety Data Sheets.

**Warranty**

Belzona guarantees this product will meet the performance claims stated herein when material is stored and used as instructed in the Belzona Information For Use leaflet. Belzona further guarantees that all its products are carefully manufactured to ensure the highest quality possible and tested strictly in accordance with universally recognised standards (ASTM, ANSI, BS, DIN, ISO etc.).
